

Our Vision

To empower Indonesia's banking sector with data-driven insights and innovative solutions that foster transparency, rigorous risk management, and sustainable growth.

Our Products and Services

I. Professional Services in Data and Software

We enable banks to fully leverage their software investments across balance sheet management, market risk, and liquidity risk reporting—transforming systems into powerful tools that strengthen risk management rigor, and improve the quality of regulatory reporting.

[Explore our capabilities below.](#)

Data Transformation, Enrichment and Software Usage

- Structure, validate, and enrich source data for internal and regulatory purposes
- Enhance data quality, consistency, and auditability to support reliable decision-making
- Calibrate parameters, assumptions, and reporting logic for accurate and compliant outputs

Dedicated Training and Continuous Support

- Build internal capabilities to maximize software utilization and interpret outputs effectively
- Provide ongoing support in response to regulatory changes and evolving supervisory expectations

Software Development

Leveraging our in-house expertise and collaborating with local programmers, BetterBankings develops key calculators to support critical risk and regulatory frameworks, including solutions for:

- Interest Rate Risk in the Banking Book (IRRBB)
- Liquidity Coverage Ration and Net Stable Funding Ratio (LCR & NSFR)
- Internal Liquidity Adequacy Assessment Process (ILAAP)
- Fundamental Review of the Trading Book (FRTB)
- Standardized Approach for Counterparty Credit Risk (SA-CCR)
- Funds Transfer Pricing (FTP)

II. Risk Practices and Advisories

BetterBankings' Risk Practice and Advisory Services provide boutique expertise in financial risk management. We help banks navigate complex regulatory requirements through practical, implementation-focused solutions—bridging regulatory expectations with real-world balance sheet management and delivering measurable impact across risk, capital, and funding.

Explore our capabilities below.

Liquidity Risk & Funding

Designing resilient liquidity frameworks that stand up to supervisory scrutiny and market stress.

- LCR, NSFR, FTP, ILAAP, and intraday liquidity frameworks
- End-to-end ILAAP design aligned with regulatory expectations
- Clear definition of liquidity risk appetite and tolerance

Impact: stronger regulatory outcomes, improved liquidity buffers, and clearer management action triggers

Interest Rate Risk in the Banking Book (IRRBB)

Enhancing earnings stability and economic value through robust IRRBB frameworks.

- Alignment with Basel IRRBB standards and local regulations
- Behavioural modelling of non-maturing deposits and prepayments

Impact: reduced earnings volatility, more stable EVE profiles, and better pricing and hedging decisions

Market & Counterparty Risk

Supporting banks in managing traded risks and meeting evolving regulatory standards.

- FRTB implementation and market risk frameworks
- Counterparty credit risk and CVA

Impact: improved capital efficiency and stronger alignment with trading and treasury strategies

Credit Risk

Building practical, decision-useful credit risk models.

- Credit risk modelling and analytics

Impact: better risk differentiation, improved portfolio insights, and enhanced capital allocation

Risk Governance & Regulatory Reporting

Strengthening oversight and supervisory engagement.

- Financial risk governance frameworks
- Regulatory reporting and submission processes

Impact: clearer accountability, more consistent reporting, and stronger regulatory confidence

Why BetterBankings

- Deep expertise across Indonesian banks, including extensive technical advisory experience with financial regulators
- Proven experience across risk, treasury, and balance sheet management
- Combining hands-on implementation with robust technical and quantitative expertise

III. Industry Data & Analytics

We transform publicly available banking data into structured insights that support benchmarking, peer analysis, and strategic decision-making. Industry Data & Analytics are delivered under our **B-foresights** brand.

Explore the products and services below for details. **Boleh juga alternatively pakai cara - Click "Learn More"*

Data Aggregation & Curation

Building a consistent and reliable view of the banking sector.

- Aggregation of publicly available bank-level data
- Curation of key banking and prudential metrics
- Standardisation to enable consistent comparison across institutions

Impact: a single, trusted source of truth for sector analysis

Peer Benchmarking & Trend Analysis

Providing clarity on relative performance and system-wide developments.

- Peer group benchmarking across key financial and risk indicators

- System-wide trend analysis across capital, liquidity, and profitability

Impact: clearer positioning against peers and early identification of emerging trends

Banking Sector Review & Bank Scoring

Delivering structured insights on bank performance, risk, and resilience—powered by consistent, data-driven analysis.

- Quarterly banking sector reviews based on publicly available prudential, financial, and industry data (launching soon)
- Independent analysis and scoring of banks using accounting and regulatory metrics
- Structured frameworks to assess performance, resilience, and risk profiles

Impact: faster, more informed decision-making for management and investors

IV. Regulatory Consulting (Regsmap)

Regulatory consulting is delivered through our **Regsmap** platform, helping banks interpret, track, and implement financial risk regulations with clarity and confidence.

- Regulatory mapping and change tracking especially across key financial risk areas
- Practical interpretation of Basel and OJK standards for implementation
- Supporting banks in understanding and complying with complex financial risk regulations
